May 23rd, 2020 - A shelter sketchbook - Timeless Building Solutions - White River Junction VT - Chelsea Green Publishing

Pany of each smaller louver is equal to the obtained depth d and protrusion p from the design chart divided by their number n, considering that their thickness is negligible.

Earth Sheltered Construction Knowledge Base

June 3rd, 2020 - Earth sheltered construction or earth sheltering is the practice of heaping earth over and or around a building. This increases the insulation of the building against extremes of both hot and cold. It is an ancient building technique but has recently returned to popularity as one aspect of passive solar construction.
